

Post Procedure IMAGES: How to take them; When and Where to send them for Review

===== **HOW:**

1. Lay baby down and approach from behind the head
2. Both index fingers together, go under the tongue (or lip)
3. Retract / pull back / open the wound fully
4. Second adult takes the photo

* If you are having trouble opening baby's mouth:
 use both middle fingers to press on the chin
 if that fails then press outside the lower lip
 if that fails then press inside the lower lip

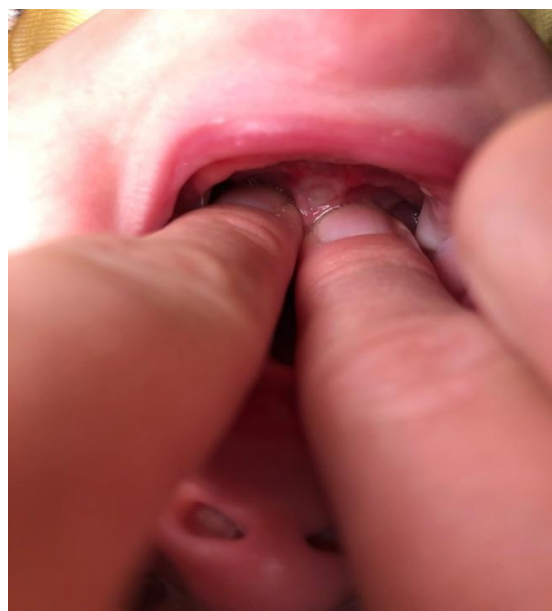

===== **WHEN & WHERE:**

EMAIL: DrYazdi@cvpd.info any images you would like reviewed after the procedure:
 take images at day 5 giving you 2 days to come in for 1week check if needed.

Do NOT text Dr. Yazdi as TEXT is NOT considered secure in healthcare.

Telephone conversations, voice-mail, and the email above are considered secure and OK to use.

===== **SAMPLE IMAGES:**

Everyone heals differently; please don't panic nor judge the wound; that's my job:)

Thank you, Dr. Yazdi
